PROJECT 2: Using Semantic Elements**DIFFICULTY LEVEL:** Beginner**Overview**

In this project you will be augmenting the provided page to use semantic HTML5 tags.

Instructions

1. Examine `ch03-proj02.html` in a browser and then in the editor of your choice. In this project the look of your page will remain relatively unchanged from how it looks at the start as shown in Figure 3.33.
2. Reflect on why adding semantic markup is a worthwhile endeavor, even if the final, rendered page looks identical.
3. Replace and supplement generic HTML tags like `<div>` with semantic tags like `<article>`, `<nav>`, or `<footer>` (for example). Some parts make sense to wrap inside a tag such as `<section>` or `<figure>`. Figure 3.33 indicates which semantic tags you should use.
